

FACILITIES: INSPECTION, OPERATION AND MAINTENANCEOperation and Maintenance

The Superintendent is charged with the responsibility for administering plant operations in the most efficient and economical manner possible, while placing high priority on health and safety of students and conservation of natural resources.

The Board of Education has the responsibility to provide equipment, supplies and contractual services of high quality.

The Board, through the Superintendent and his/her staff, has the responsibility of protecting the District investment in plant and facilities through a systematic maintenance program.

It is expected that the program shall include periodic preventive maintenance activities, long-range maintenance schedules and emergency repair procedures. It is further expected that all maintenance work will be carried out in a manner that will cause the least interference with the educational program.

Inspections

The administration of the school system shall cooperate with officials conducting health, fire, asbestos, bus, and boiler inspection. The administration shall keep the Board of Education informed of the results of such inspections in timely fashion.

The Board should conduct an annual building and grounds inspection as part of the inspections program.
