

COUNTY-WIDE CHILD CARE FACILITIES FOR HEALTHCARE & EMERGENCY SERVICES PERSONNEL

Our County Executive and the County emergency services personnel are organizing and managing the child care needs in our area. We are using the CCR&R services and existing Community Based Organizations (CBOs) that are already opened and licensed. They are especially focusing on the child care needs for health care providers and emergency services personnel. They are working directly with those providers. Our local CCR agency has set up a referral email address and we have included the latest information on childcare facilities available.

Family Enrichment referral email is the fastest way for parents and essential workers to get referrals: referrals@familyenrichment.org .
