

VOICES IN THE DARK

Students learn history from local cemetery

By Kim Rusnak, social studies teacher

Crisp fall air and a clear nighttime sky created the perfect setting for the Colesville History Class' presentation, "Voices in the Dark," on Monday, October 28.

See "Voices," page 5

Letter from the superintendent

Dear residents,

As we enter the month of November, there is no better time of the year than now to express my gratitude and appreciation for all of the wonderful things that happen here in our schools. It takes the cooperation and support of so many people to help make our school district the best place it can be for our students. So, on behalf of everyone here at the school, THANK YOU!

Furthermore, I hope that you are enjoying what has been a beautiful fall season. We are fortunate in our community that we get to experience the amazing fall foliage and the vibrant colors of our hillsides. As much as I enjoy this time of the year, my two favorite colors of fall are still the blue and gold of our Harpursville Hornets.

The first quarter of the school year is just about to end, signaling, among other things, that our fall sports have come to a close or will be very soon for those teams that advanced to state tournament-level play. In fact, as I write this article, I am thinking about the sectional championship game that our field hockey team will be playing. It's been an outstanding fall season for our field hockey girls and all of our fall athletes, for that matter. They've worn their jerseys with pride and have put their best foot forward throughout their seasons, demonstrating the commitment and sportsmanship that we expect and demand of our student athletes. I am proud of our athletes and our coaches, and I thank all who came out to support our teams this fall on the field or court. Hornet pride is alive and well!

I'd like to take a moment to highlight and congratulate the 2019-2020 Akshar All-Star from the Harpursville Central School, Cole Marade. Cole is a senior in our high school this year and he was recognized by Senator Akshar on October 17 for being an outstanding role model to our elementary students. Here's an example: During the last school year, Cole would go over to the elementary school every morning to have breakfast with and mentor one of our kindergarten students. The "big brother" relationship that developed was amazing. Even though this was challenging at times, Cole stayed the course and remained dedicated to this little guy. Furthermore, Cole never once asked for any recognition. Given this story, I think you'll agree that it is people like Cole who make communities and, in particular, our school better. Congratulations, Cole, and keep being a role model and a leader through your service to others.

In thinking about the next month, we have a few things to look forward to that I'd like to bring to your attention. Once again, we'll be enjoying our annual Thanksgiving

Luncheon with members of the Senior Center of Eastern Broome. Our Student Council and National Honor Society students will be serving our lunch guests. Nothing brings people together in a better way than a great meal.

On a completely different note, I want to let you know that we are in the process of a complete redesign of our website. I am hoping that this is up and running by the end of November. Not only will the website look more modern and be more user-friendly, but once the changeover is made, the website is going to work very well with your smartphones. I know this is good news for everyone, as most of us use our smartphones to access just about everything. The website will (finally) fit nicely on the screen and you will be able to access everything that the website has to offer.

Similarly, we are in the process of developing our own unique Harpursville Hornets app for your phones, which will put all kinds of useful information right at your fingertips. Additionally, it will allow for push notifications of important information once you start using the app. Keep an eye out for both of these enhancements to our communication systems in the near future; I think they're going to be a huge help and you're really going to like the functionality.

In closing, I'd like to extend warm wishes to each of you as we approach the holiday season. I hope you have a wonderful Thanksgiving and that you are able to enjoy some time with your family, friends, and all of those that are important to you. I know I will certainly be giving thanks for my life as a Harpursville Hornet and I hope you'll do the same.

Yours in education,

Michael J. Rullo

Go Hornets!

Michael Rullo,
superintendent

District communication guidelines

Frequently, parents and other community members request help in knowing the best way to communicate with the school. The chart below will serve as a helpful resource. By contacting the following people in the prescribed order, you can be assured that your questions will be answered.

Join Harpursville Ski and Board Club Today

Program Information: Student Program Pass includes 6 weeks of skiing/snowboarding and 2 or 4 weeks of lessons. At the end of the 6 weeks the pass remains valid for students to ski/snowboard. March 14, 2020 the passes convert to season passes for the remainder of the season. If you already have a season pass, you may still sign up, just select the season program pass option when registering and add pass add-ons. Parents may also purchase the parent program pass and include 6 weeks of skiing/snowboarding, and then the pass turns into a season pass on March 14 as well.

Day and Time

Sundays 2 to 5 p.m.

Start Date/End Date

January 5, 2020 through February 9, 2020

Cost

NEW REDUCED PRICE! \$90

Rentals

\$63 - Choice of ski or snowboard equipment rental

Helmets

\$43

Additional Lessons

\$30 – Select this option if you would like 2 additional weeks of Lessons (2 weeks are included for the \$90 price)

Meal Plan

\$63 - Students will have 1 meal each week including a choice of entrée, side and a drink at the Taverna

Transportation

Bus departs from triple door at entrance to High School Gyms at 12:30 p.m. and returns at 6:30 p.m.

Sign up a Friend!

If you participated last year and you know someone interested in signing up that didn't participate last year you can get 7% off your pass and 5% off your friends pass. Please call us at 844-846-9575 or 844-846-9572 to register over the phone

Voices - *from the cover*

Guests were escorted by candlelight to the gravesites of town notables at Riverview Cemetery in Harpursville where they heard first-person narratives on the individuals' lives. Robert Harpur, Amelia Keeler, Stuart Watrous and others spoke about their families, their accomplishments, and their contributions to the Town of Colesville. A more recent resident, Shawn Livingston, had his inspirational story told by his sister, Darla Dayton, who shared his medals with the audience as well. Shawn won several medals, including a gold medal for bowling in the Special Olympics held in Athens, Greece.

It truly was a wonderful evening for the students to teach others about some of the town's ancestors.

Letter from the elementary school principal

Wow, I can't believe it's November already.

Our students have been hard at work in the classroom learning new material and working on differentiated instruction through the use of I-Ready, which is a diagnostic instructional reading and mathematics program for students in grades K through 6. This program is adaptive, so it identifies the student's strengths and weaknesses and targets instruction for each individual student. Our students have also had an enjoyable Fall with various fun events, including the activities of Homecoming Week ending with a pep-rally, Fall Fest, the 6th grade Halloween Dance, and the Halloween parade and class parties.

Classrooms have also been celebrating days of perfect attendance with a "Give a Cheer We're All Here" sign posted outside classroom doors. A growing body of research is revealing the prevalence of chronic absence and its critical role in student achievement. Studies show that attendance problems in the early years of elementary school predict absenteeism in later grades, and students with the highest absenteeism typically scored lower on state assessments.

For these reasons, the message regarding the importance of school attendance will continue throughout the year. Although over a 95% percent daily attendance rate at W.A. Olmsted Elementary School seems like a great number, that really means that more than 20 students are absent from school each day, which is equal to one classroom of students missing instruction every day.

Jim DiMaria,
elementary Principal

As always, please contact me with questions or concerns.

Jim DiMaria

Principal

Youngsters learn about fire safety with visit from local firemen

Students in grades pre-K through first got a special visit recently from Harpursville Fire Chief Jeff Buckler and fellow firefighters Steve Brown, Robbie Ayers and Mark Ayers, who talked about how to avoid fires in the home and what to do if one starts.

Congratulations to Cole Marade on being named an 'Akshar All-Star'

Throughout the school year high school students are picked to mentor our younger students in the elementary building during the school day. Many times our older students will do this for a few weeks and move on to other opportunities available to them. Cole, however, created a strong bond and amazing friendship with Jaxon, and continued to mentor for the whole year. This has been such a rewarding experience for both boys that Cole has been asked to continue to mentor again this year with Jaxon. In Senator Akshar's words, "Cole made a huge difference everyday for Jaxon. It is people like Cole that make communities, and in particular your school, better. Congratulations Cole and keep being a role model and a leader through your service to others."

Your school family is so proud of you Cole!

Pictured (l-r): Cole Marade and state Senator Fred Akshar.

High school students get hands-on experience at Con-Tech career day

A group of Harpursville students joins nearly 600 of their peers from throughout the region at the annual Construction and Technology Career Day at the Broome County Highway Department facilities in Chenango Bridge. The event features exhibits by numerous organizations and schools associated with the construction and technology

industries as well as trade displays and equipment demonstrations. For many students, the hands-on experience included the opportunity for supervised operation of a variety of heavy equipment, including dump trucks, bulldozers, excavators and many other types of vehicles.

 *Congratulations!* 

Dear Harpursville community,

Students have all settled into the routine of school and are just about finished with the first quarter. At the beginning of the school year, students take some standard assessments to show their teachers what they know in a variety of subjects. This information enables teachers to plan instruction that supports the specific needs of each student. This year, we are also using another form of assessment and instruction in K-8 classrooms called *i-Ready*.

i-Ready is an online program for reading and math that will help your child's teacher(s) determine your child's needs, personalize their learning, and monitor progress throughout the school year. *i-Ready* enables teachers to meet a child exactly where they are and provides data to increase the child's learning gains. *i-Ready* consists of two parts: diagnostic and instruction.

The *i-Ready* diagnostic is an adaptive assessment that adjusts its questions to suit your child's needs. Each item a student sees is individualized based on his or her answer to the previous question. For example, a series of correct answers will result in slightly harder questions, while a series of incorrect answers will yield slightly easier questions. *i-Ready* instruction provides students with lessons based on their individual skill level and needs, so a child can learn at a pace that is just right for them. These lessons are fun and interactive to keep children engaged as they learn.

The diagnostic in math covers these domains:

- **Number and operations:** In grades K–8, this refers to the mathematics skills often thought of as arithmetic, from reading and writing numbers to adding, subtracting, multiplying and dividing different types of numbers. This includes whole numbers, decimals, fractions, integers and irrational numbers.
- **Algebra and algebraic thinking:** In grades K–8, this refers to math skills related to seeing number patterns, understanding the meaning of addition, subtraction, multiplication and division, and using symbols to write and solve equations including those used to solve word problems.
- **Measurement and data:** In grades K–8, this is a wide range of math skills related to collecting, organizing and interpreting numerical information, from telling time or using a ruler to measure the length of an object, to using formulas to find volume or surface area. It also includes understanding tables and graphs and, in later grades, statistics and probability.
- **Geometry:** In grades K–8, this refers to a variety of skills related to analyzing two- and three-dimensional shapes. These include naming and classifying shapes using characteristics such as symmetry, number of sides and angle measures, and, in later grades, using congruence and similarity.

The diagnostic in reading covers these domains:

- **Phonics:** Connecting the sounds they hear in spoken words to the letters they see in written words. For example, a student who can connect sounds to letters knows to read “th” in then as a single sound /th/, rather than the sound /t/ and the sound /h/. Students have to learn many different connections between sounds and spelling patterns. In fact, there are so many connections that learning phonics can feel like learning the rules to understand a hidden code. Once students can make these connections quickly and easily, they can really start to read for meaning.
- **High-frequency words:** Words that appear most often in what children read. Words such as “the”, “and”, and “it” are high-frequency words. Because these words appear so often, readers must learn to recognize them automatically. Learning to recognize these words automatically helps students read more quickly and easily, which gives them a better opportunity to understand what they are reading.
- **Vocabulary:** Words a student knows. The more words a student knows, the easier it is for the student to understand what is being read. Good readers know the meaning of many words. Students grow their vocabularies by hearing and reading new words, talking about words and being taught specific words.
- **Comprehension - literature:** A student's ability to understand various types of writing, made up or fictional. Stories are the literary texts that students read most often, but plays and poems are also examples of literary texts. A student who understands literature might identify the sequence of events in a story, discuss the meaning of a poem, or explain the lines a character speaks in a play.
- **Comprehension - informational text:** The student's ability to understand types of writing that are usually true. Books about science or history are examples of informational text, as are newspaper articles or magazine articles. It is usually organized into sections with headings and might contain charts, diagrams and graphs that are important to understanding. A student who understands informational text might identify the main idea and supporting details, describe the way the writing is organized, or draw information out of a photograph or diagram.

All students in grades K-6 have taken both the math and reading assessment (diagnostic) in *i-Ready*. The 7th and 8th graders will be taking both in the next two weeks. If you have a student in one of those grades you will receive some information from your child's teacher. Please talk with your students about how their *i-Ready* lessons are going. Soon, parents will be able to log on and see their child's progress. Information will be sent home from your child's teacher when that becomes available.

We are excited about the opportunity *i-Ready* will provide for both our students and teachers. Please reach out to your child's teacher with any questions you have.

Pam Horton
Director of Instruction

Welcome

School community welcomes new high school nurse

Hello, Harpursville families. My name is Becky Adolf and I am so happy to be joining your school district.

Before coming to Harpursville, I was a school nurse in the Windsor Central School District, worked for home care and hospice in the community, and have critical care experience from one of our local hospitals. Before becoming a registered nurse, I taught middle school social studies. I have also coached multiple sports at all levels.

I'm looking forward to meeting the students here at Harpursville Jr. Sr. High School and wish everyone a happy and healthy school year.

Share your thoughts

We are interested in how the community views parent/teacher communication within the school. If you are interested in sharing your thoughts, please complete this survey at your convenience. You will need to use a QR code reader to access the survey electronically. We appreciate your input. If you would like a hard copy of the survey, please contact Leslie Whaley at lwhaley@hcs.stier.org.
