Jacob Stiner, a 4<sup>th</sup>-grader, raised \$150 in support of the American Heart Association at the recent Jump Rope for Heart event. He was this year's top fundraiser.

## Art trip offers new experiences ~ Amy Rossie-Ashbaugh and Ann McDonald

We are always in search of new and interesting places to take our Jr. and Sr. National Art Honor Society students in hopes of exposing them to meaningful art related experiences. This year's trip did just that.

Our first stop was the Everhart Museum in Scranton PA. This museum is the oldest in the state and features natural history collections including native birds, fossils and rocks and minerals. The museum offers an extensive collection of 19th and 20th century art as well as an American Folk Art collection. The Everhart Museum is well worth a visit. The museum staff was very impressed with our students. Thanks to our district's frequent curriculum connections beyond the classroom walls, Harpursville students know how to conduct themselves in museums. They asked good questions and answered difficult ones. They made the museum visit an educational and enjoyable experience. We were very proud of them.

Next stop was Marywood College. We arranged a question and answer session over lunch with two of our alumni, Espey Gutierrez and Emily McElwain. Esperanza is studying broadcast journalism and Emily is studying art therapy. This was a delightful exchange of information and wisdom.

From there we were treated to a tour of the Art College studios and galleries.

The students got a behind-the-scenes look at classes in session and art studios. They

Morgan Linkroum comes face to face with art

were impressed with the extensive amount of materials, equipment and tools provided to the art students.

“  
**The museum staff was very impressed with our students.**  
”

Throughout the art building are galleries housing student work as well as private collections.

Marywood has exceptional art programs in clay, fiber arts, painting, illustration, drawing, sculpture, art therapy, museum studies, art education, and arts administration. Often our students do not always consider arts administration, museum studies and art therapy when searching for art related careers.

Aside from the fun of looking at a variety of student art

## A seasonal notice from the health office

We are finally seeing warmer temperatures and our students are happy to once again be going outside for recess, so please send a change of clothes for your child to keep at school in case of spills or muddy or wet conditions. The health office does not always have clothes in every size and most children prefer their own clothing when accidents happen. Thank you.

## Students continue tradition with 'Jump Rope for Heart' program

Congratulations to the 91 third-through sixth-graders who volunteered for the American Heart Association's annual Bryan Kelly Memorial Jump Rope for Heart.

The students and staff collected a total of \$2,642, which will be used for the prevention, education, and treatment of cardiovascular disease and stroke. Heart disease and stroke are still the #1 and #3 killers in America, as one person dies every 33 seconds from some form of cardiovascular disease. It is through the volunteers' commitment to make a profound impact on people's lives that truly inspires others to join the fight against such a deadly disease.

PE teachers Julie Dietrich and Shawn Riley would like to thank all the volunteers for their time and effort.

and all those in the community and on staff who donated to this worthy cause. We would also like to thank the PTO for the \$150 donation toward this event. The top money raisers were Jacob Stiner, Alana Nannery, Bradley Bennett and Brendon Pike. Many students won sports equipment such as basketballs, playground balls, water bottles and lanyards. Participation this year more than doubled last year's due to the addition of an Asteroid Tournament. Each student who participated received a free frozen treat from Skinny Licks, located on Reynolds Road in Johnson City. We thank everyone who was a "heart hero."

## Families enjoy elementary PE Night

On March 4, students in prekindergarten through sixth grade and their families participated in our annual PE Night. There were a variety of stations set up in the elementary gym to keep everyone active and show parents some of the activities we participate in during PE class. Students got to take turns at the traverse climbing wall, which was moved this past summer from the high school. They learned about their heart muscle by traveling through the heart obstacle course. Ms. Zina showed up to lead some Zumba dancing. We would like to thank all the families who participated in

this successful event. We would also like to thank the PTO for providing a healthy snack and water.

## Students 'feelin' good' about walking

Students at W.A. Olmsted once again will be busy walking for our annual Feelin' Good Mileage Club. During recess students will be keeping count of the miles they walk. Special toe tokens will be awarded to put on their shoelaces. The Mileage Club is a great way to teach students the benefits of daily exercise.

## Art, from the cover

we were allowed access to the area that houses the college's private Maslow Collection. Here the students had a chance to see work by world renowned artists of our time, including Chuck Close, Edward Henderson and David Reed.

It was a very good day.

### Students give French expressions an artistic interpretation

This month, in French IB, we have been working with our "Fave Five" verbs. As part of this work, we studied some common phrases in French that

express our opinions. To help others understand what these expressions mean, the students used their artistic talents to give pictorial representations

of the expressions. We really enjoyed doing this activity and hope that you enjoy our creative and humorous illustrations.

## FAMILY Movie Night

**Friday May 15**

**Show starts at  
7 p.m.**

In the high school  
auditorium

All proceeds will be donated to the  
Colesville Food Pantry  
from Class of 2018 & PTO

All Children must be accompanied by an adult.  
**Concessions by Class of 2018**

Sponsored by the Harpursville PTO  
PTO chairperson Heather Medovich 693-8123

## Learning with guided math groups and stations

by Karen Shannon's class

Our fourth-grade students learn their math concepts in a unique manner while also practicing for upcoming state tests.

We start with a whole-group mini-lesson that introduces the target. Teachers model problems for the lesson then students practice some problems, learn vocabulary and discuss their problems with their groups. They then move into smaller groups with their teachers (Karen Shannon and Quinn Berkeley), where they practice the concepts of the target lesson. When the students leave the small group, they are assigned problems to practice independently before they go to the stations.

While some students are meeting in small groups, the others are working at math stations. We've had some fun station activities such as practicing our facts with "wrap ups," in which students use a string to cross over to the product of their

multiplication fact. Another station is called the "creation station," where students design creations using geometric polygon pattern blocks such as triangles, hexagons, rhombus, parallelograms, trapezoids and squares. The students are asked to record how many of each polygon they used for their creation and do some fraction work.

Mrs. Avery, our classroom aide, monitors the independent stations to make sure students are on task and to help them when needed. The station activities are different each week. In another example, students created symmetrical designs at the creation station while playing a fraction festival game. Sometimes the independent stations are for review, and some relate to the fraction lessons they are currently learning.

Joey Florence and his design

Amber Kachmar

Cooper Smith, Jacob Decker, Savannah DeVaul with fraction strips

Cooper Smith with bug picture

Madison Fleming working

Andrew Ramey with wrap up

The students were very excited about the new design for our math block and wanted to share with you what they thought:

**"I liked small stations because I liked building with the pattern blocks. We were able to work together and communicate with our classmates."**

*-Joey Florence*

**"I like the creation station. You can make anything you want with the polygons. In small groups it helps me because I learn about fractions and my brain gets smarter."**

*-Jaylyn Merrill*

**"I like the independent station because there is a lot of fun things to do like fraction strip practice and pattern blocks. I like working in small groups with the teacher because we do fun things with math."**

*-Mikel Hill*

**"I think that small groups are easier. I personally think that ideas are easier for every student."**

*-Jayleigh Werner*

**"I think math stations are fun because I get to work with different teachers. It helps me with math a lot! Another thing I liked at the creation station was making pictures and fractions with pattern blocks."**

*-Kaydence Schultz*

**"I like the creation station. I built a butterfly and a heart of a castle. I love groups with the teachers. There is up to six of us in a group. It's easier to learn."**

*-Savannah DeVaul*

**"I like when we do time challenges because it is challenging. Small groups are more fun because we work with all the teachers."**

*-Jayden Yereb*

**"I like the small groups because I can understand new ways to do fractions and it's easier."**

*-Owen Ellsworth*

**"I like when we do the time challenge. It was fun to have a challenge. I like to do small groups because we get to talk and it is helpful to learn that way."**

*-Madison Fleming*

**"I like how we are in groups. My favorite is the creation station because you get to create what you want."**

*-Cooper Smith*

**"I like the creation station. I like it because we can create what we want. I can create anything with the pattern blocks."**

*-Sawyer Lusk*

**I liked the wrap ups because they help me with my multiplication. I also liked everything because it helps me learn and it is fun because of the challenges."**

*-Kody Springstead*

**"I like how we do math in groups. For me, it's easier in groups because my friends can work with me."**

*-Andrew Ramey*

**"I loved to do the time challenges in small group. I like these challenges because I have one minute to figure out as many problems as I can. I feel happy because it helps me go faster in math."**

*-Amber Kachmar*

# Greater Chenango Cares 8 a.m. - 5 p.m. July 13 –23

Norwich City School District complex, Midland Drive, Norwich

### What is Greater Chenango Cares?

It is a partnership with the Department of Defense to provide an opportunity for residents of Chenango County and neighboring counties to participate in a **no-cost** military training program known as “innovative readiness training” (IRT).

### What is innovative readiness training?

Innovative Readiness Training provides real-world training opportunities for our service members to prepare them for wartime and disaster missions while supporting the needs of America’s underserved communities.

### What services are provided at no cost and how do I participate?

**Dental:** Cleanings, fillings, fluoride treatments, sealants and simple extractions

**Medical:** Risk assessment for: risk factors for diabetes, high blood pressure. Nutrition counseling, pain management, etc.

**Optometry:** Testing for cataracts, glaucoma and macular degeneration. Visual examinations for single-focal distance or reading prescription glasses. Your choice of one pair of prescription glasses (distance or reading) manufactured onsite for pick-up in 48 hours (no charge).

**Veterinary (must be pre-scheduled):** Spay, neuter and vaccinations for companion animals (dogs/cats)

*\*No narcotics administered for services.*

No residency, income or insurance requirements to participate in this great opportunity.

Walk-ins welcome. Scheduling for transportation will be available for participants without animals.
